Payments may be made through most financial institutions, through telephone banking or Internet banking. All Guelph Hydro Electric Systems Inc. customers may take advantage of our Preauthorized Payment Plan. Regulated Price Plan customers may opt for our Preauthorized Budget Plan as well. The reverse side of residential bills lists the agency stores where we accept payments.

VIEW YOUR ACCOUNT ONLINE

Customers have the ability to access account information quickly and easily, any time of the day or night. All you need is a computer and Internet access.

You can:

- view current statements and due dates
- view meter reading information
- compare billed usage
- view billing history
- receive your bills electronically
- cancel *epost*™ subscriptions
- view payment history

Advantages:

- private and secure
- convenient
- access your bills online anywhere, 24 hours per day, 7 days a week
- best of all, it's **FREE**

EXPLANATION OF ELECTRICITY TERMS

Electricity

This is the cost of electricity supplied to you during the billing period and is the part of the bill that is subject to competition. The electricity consumed is multiplied by the distribution loss factor. Guelph Hydro Electric Systems Inc. collects this money and pays the same amount to its suppliers.

Note: When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business. The distribution loss factor accounts for these losses.

Delivery

These are costs of delivering electricity from electricity generating stations across the province to Guelph Hydro Electric Systems Inc., then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles and operate provincial and local electricity systems. Guelph Hydro passes the transmission and low voltage service charges through to you, without a mark-up, on behalf of Hydro One.

A portion of these charges is fixed and does not change from month to month. The rest are variable and increase or decrease depending on the amount of electricity that you use.

Regulatory Charges

Regulatory Charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid and include the costs associated with funding Ministry of Energy and Infrastructure conservation and renewable energy programs.

Provincial Benefit

The Provincial Benefit is an adjustment for the difference between the market price and rates paid to regulated and contracted generators. This will be either a credit or a charge depending on the prices for electricity in the Independent Electricity System Operator (IESO) spot market. Provincial Benefit is applicable to large commercial consumers and consumers having a retailer agreement.

Power Factor Charge

Power Factor is a measure of how effectively your equipment converts electric current into useful power output, such as heat, light or mechanical motion. Low power factor, or less effective use of electric current, will be an added cost to your bill. There are two kinds of power: usable power called kilowatts (kW), and reactive power called kilovar (kvar). The ratio of your usable power consumption to your reactive power consumption determines your power factor. When your power factor drops below 90%, a power factor surcharge is applied to cover the cost of supplying additional reactive power.

Debt Retirement Charge

The Debt Retirement Charge pays down the debt of the former Ontario Hydro.

RATE SCHEDULE

Effective MAY 1, 2010

395 Southgate Drive,
Guelph, ON N1G 4Y1

Billing Inquiries: 519-822-3010
Other Inquiries: 519-822-3017
Fax: 519-822-0960
Email: binquiri@guelphhydro.com

A smart meter has either been installed at your service address or it will be installed sometime during 2010. This is in accordance with the mandate by the Ontario government that all residences and small businesses must have a smart meter installed by the end of 2010. Time-of-Use rates for electricity will come into effect for Guelph Hydro Electric Systems Inc. customers in 2011.

For more information regarding smart meters or Time-of-Use rates for electricity, please visit our website at: www.guelphhydro.com

www.guelphhydro.com

REGULATED PRICE PLAN

As a residential or small business customer whose demand is less than 50 kW, you are automatically part of the Regulated Price Plan (RPP) where you are charged a regulated price per kilowatt hour (kWh) for the electricity you use. You also have the option to purchase your electricity from an electricity retailer. If you buy your electricity from an electricity retailer of your choice, you are considered a Non-RPP*** Customer and will then pay the rate for electricity stated in your contract.

RPP prices are based on a 12-month forecast and are designed to provide stable and predictable electricity pricing as well as ensure the price consumers pay reflects the price paid to electricity generators.

RPP rates are set by the Ontario Energy Board and are adjusted twice a year in the spring (May 1) and the fall (November 1).

Residential Customers

May 1, 2010 to October 31, 2010

First 600 kWh used per month*	\$0.0650 ♦
All kWh used above 600 kWh per month	\$0.0750 ♦

Non-Residential Low-Volume Customers

May 1, 2010 to April 30, 2011

First 750 kWh used per month*	\$0.0650 ♦
All kWh used above 750 kWh per month	\$0.0750 ♦

*Includes kWh due to line losses

Those customers who have more than one dwelling unit as defined by the *Condominium Act*, *Tenant Protection Act*, or the *Co-operative Corporation Act* can declare this information to Guelph Hydro Electric Systems Inc. in writing using the self-declaration form available at our office or on our website under "Declaration Form – Multi Unit Premises." The Residential rate will be applied according to the number of units.

Electricity, Delivery & Regulatory Charges

The new delivery charges and electricity charges are effective from May 1, 2010. Our rates are prorated on a 30-day bill. The bill you received for consumption before and after May 1 was prorated for delivery and electricity charges. A Special Purpose Charge of \$0.000372 per kWh will also be added to all accounts for electricity conservation programs (authorized by Ministry of Energy and Infrastructure).

RESIDENTIAL

Electricity

First tier* / month** / (per kWh)+	\$0.0650 ♦
Remaining kWh (per kWh)+	\$0.0750 ♦
	<i>or energy retailer contract price</i>

Delivery

Monthly Service Charge*	\$14.39
Distribution Volumetric Rate (per kWh) ***	\$0.0147
